Application: Spray undiluted product evenly onto granulated fertiliser and immediately mix thoroughly in a mechanical mixer or auger. Apply at a rate, which will deposit 200 mL of the product on the quantity of fertiliser required to be sown in furrow per hectare, using the table below as a guide.

GENERAL INSTRUCTIONS

FERTILISER APPLICATION

Granulated Fertiliser

To determine the correct volume of Smart Azure 500Fungicide required to be applied, refer to critical Comments in the Directions for Use table, which provides a guide based on a range of common fertiliser rates.

Ensure that treated fertiliser is dry before sowing with the crop.

Treated fertiliser should be applied in a band 3-4 cm below or to the side of the seed in the planting furrow. It should not be broadcast.

Note that the flow rate of fertiliser may be changed after treatment, and the seeder should be calibrated with the treated material to ensure that the correct rates of fertiliser and fungicide are delivered.

Do not mix seed with treated fertiliser and Smart Azure 500 Fungicide.

FUNGICIDE RESISTANCE WARNING

GROUP 3 FUNGICIDE

Smart Azure 500 Fungicide is a member of the DMI group of fungicides. For fungicide resistance management Smart Azure 500 Fungicide is a Group 3 fungicide.

Some naturally occurring individual fungi resistant to Smart Azure 500 Fungicide and other Group 3 fungicides may exist through normal genetic variability in any fungal population.

The resistant individuals can eventually dominate the fungi population if these fungicides are used repeatedly. These resistant fungi will not be controlled by Smart Azure 500 Fungicide or other Group 3 fungicides, thus resulting in a reduction in efficacy and possible yield loss. Since the occurrence of resistant fungi is difficult to detect prior to use, Crop Smart Pty Ltd accepts no liability for any losses that may

Since the occurrence of resistant fungi is difficult to detect prior to use, Crop Smart Pty Ltd accepts no liability for any losses that may result from the failure of Smart Azure 500 Fungicide to control resistant fungi. Resistance should not be assumed without first reviewing the method of application, the coverage and the timing of application.
